SPIFFING UP THE TACOMA DOME

Workers from Pioneer Masonry Restoration Co. of Seattle give the Tacoma Dome roof its first cleaning since June 2000, and by yesterday were halfway through with the project, which began May 22. The roof spans an area of 265,000 square feet. Workers are tethered to it with ropes and use brushes, low-pressure hoses and Simple Green, a non-toxic cleaning product, to do the job.

全球美軍 軍事基地 清潔保養

U.S. military power depends on moving troops and equipment quickly around the world. Support from private industry and friendly nations is an essential component of major military operations, especially in the Middle East and Central Asia. Simple Green is one of those private industry suppliers.

Simple Green and the U.S. General Services Administration (GSA), the department of the government which secures the buildings and products federal agencies need, have worked together for over 15 years. In preparation for the recent activity in Afghanistan and Iraq, Simple Green was involved early on to help preposition all of our overseas military customers with the supplies they need. Simple Green has continued to work in a timely manner to resupply these customers and to anticipate their needs.

With such a variety of customers from all branches of the military, Simple Green products are being used in numerous types of applications including base and ship maintenance, equipment cleaning, weather related cleanup efforts and war recovery.

As a valued partner of the GSA since the mid 1980's, Simple Green is proud to support the United States in its government and military operations.
